Subject: **SOURCE REDUCTION REMEDIAL ACTION**
Project Progress Update No. 16

I. SOURCE REDUCTION REMEDIAL ACTIONS - MAY 25TH THROUGH JUNE 7TH 2005

1. Continued morning safety briefings (e.g., discussion of daily work scope and associated health and safety procedures)
2. Maintained all on-site heavy equipment (e.g., excavators, skid steer, off-road truck, screen, etc.). Initiated demobilization of some equipment following completion of the smear zone excavation and waste loading.
3. Performed and documented daily inspections on the silt fence as outlined in the certified SESCP
4. Cleaned all paved areas with a skid steer broom attachment and manual sweeping
5. Terminated receipt of cement kiln dust (CKD) to facilitate ex-situ drying of smear zone soils prior to screening, stockpiling, and off-site disposal as the smear zone excavation is now complete. A total of 3,959 tons of CKD were delivered and utilized at the site.
6. Completed the smear zone excavation utilizing the slurry mix. Loading and transportation of smear zone soils began on March 28, 2005. A total of 34,052 tons of smear zone soils have been transported and disposed off-site.
7. Initiated backfilling of the wetland, transition zones and main excavation areas.
8. As built surveying of the excavation areas, wetland areas, and transition zones is complete. Surveying will be performed on the site wide final grade in the wetland, transition zones and main excavation areas once backfilling is complete and final grade has been established.

II. PROPOSED SOURCE REDUCTION REMEDIAL ACTIONS - JUNE 7TH THROUGH JUNE 14TH 2005

1. Continue backfilling wetland, transition zones and main excavation areas.
2. Survey final grades and initiate site restoration in the main excavation area.
